7+ yrs
Shipping Laravel in production

500K+
Monthly visitors served

35%
Server cost reduction

// profile

Laravel developer with **7+ years** building high-traffic web platforms and SaaS products. I led backend development for **Pedal1.com** and **Collegenp.com**, working in Laravel 10/11, Livewire and Vue. My focus is performance optimization, scalable API design, and Nepal-specific payment integrations — shipping products that **100K+ people** actually use.

// projects

Pedal1.com

Lead Laravel Developer

Multi-tenant SaaS ERP for HRM, CRM and project management

Built the core platform end to end: an HRM module for employee records, attendance and leave; a CRM for leads, clients and the sales pipeline; project management with tasks, milestones and timesheets; plus role-based permissions and a custom admin dashboard teams run day-to-day operations from. Every company is onboarded as an isolated tenant on its own subdomain.

- Subdomain-per-tenant architecture — each company gets isolated data and its own configuration off one shared codebase
- Cut page load time **50%** with response caching and query optimization

`Laravel 11` `Livewire` `Multi-tenancy` `MySQL` `Redis` `Queues` `Spatie Permissions`

Collegenp.com

Senior Laravel Developer

One of Nepal's largest education portals

College listings, admission forms, advanced search filters, a content CMS, and role-based access for editors and institutions.

- Serves **500K+ monthly visitors** through admission-season spikes
- Added a queue system and CDN layer so traffic surges stopped taking the site down

`Laravel 10` `Blade` `Horizon` `MySQL` `Redis` `Cloudflare`

// experience

Senior Laravel Developer

2021 – Present

Pedal Group Pvt. Ltd.

- Architected and maintained the Pedal1.com and Collegenp.com codebases
- Cut server costs **35%** with Redis caching and optimized Eloquent queries
- Integrated Khalti and eSewa for **3 clients**, reducing payment failures **20%**
- Mentored **3 junior developers** and set up CI/CD with GitHub Actions

Full Stack Developer

2019 – 2021

Pedal Group Pvt. Ltd.

- Built **10+ Laravel APIs** and admin panels for US and UK clients
- Developed frontends in Vue.js and Blade against Laravel backends
- Delivered projects **2 weeks ahead of schedule** on average

Laravel Developer

2016 – 2019

Vertex Solution Inc.

- Built and maintained Laravel websites for **travel agencies** — tour and package listings, itinerary pages, and booking enquiry flows
- Joined as a web designer and moved into Laravel development after the first year, spending **2 years** on the backend
- Turned client designs into responsive, CMS-driven front-ends non-technical staff could update themselves

// stack

Backend	PHP 8.2 · Laravel 10/11 · Eloquent ORM · Queues · Horizon · Sanctum · WebSockets
Frontend	Blade · Livewire · Vue 3 · TailwindCSS
Data & infra	MySQL · Redis · AWS · DigitalOcean · Cloudflare · Git · GitHub Actions
Payments, Nepal	Khalti · eSewa · IME Pay API integration
Tooling	Stripe · REST API · TDD · CI/CD
